DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/26/09 has been entered.

Examiner's Comments

2. The most recent set of claims of 5/26/09 now contain claims 17 and 20 which were canceled, see claim set of 2/9/07. Thus, claims 17 and 20 have not been considered herein. If applicant wants to reinstate claims 17 and 20 they should be renumbered as claims 29 and 30 in response to this office action.

REJECTIONS WITHDRAWN

3. There are no rejections withdrawn.

REJECTIONS REPEATED

4. All of the rejections maintained in the final rejection of 11/26/08, page 2, paragraph 2.

NEW REJECTIONS

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by Furuya et al. (US 4355756).

Furuya discloses a method for packaging and retort sterilizing a food product (column 2, lines 1-34) comprising the steps of maintaining said retort sterilization for a time sufficient to heat said container and said food product to a temperature providing sterilization of said food product while maintaining dimensional stability (column 5, line 57 through column 6, line 2), wherein said article has an F value of between 3 and 18 (column 6, lines 1-2) and wherein the laminate contains an aluminum barrier layer (column 2, lines 11-34) and wherein said laminate additionally includes a coating adjacent on one or both sides of the barrier layer wherein the coating is an adhesive plastic (column 3, lines 38-54, since LDPE is taught).

ANSWERS TO APPLICANT'S ARGUMENTS

7. Applicant has not provided any arguments, other than to say new claim 28 has been added, in the response of 5/26/09. Therefore there are no arguments to address.
